At step 6, number represents the maximum monitor's refresh rate. Make any appropriate changes. Also, make sure v-sync (vertical synchronization) is off from in-game settings.

1.

Go to Documents\My Games\Chivalry Medieval Warfare\UDKGame\Config

2.

Open UDKEngine.ini

3.

Ctrl+F and type "framerate"

4.

Set bSmoothFrameRate=TRUE

5.

Set MinSmoothedFrameRate=0

6.

Set MaxSmoothedFrameRate=144

7.

Launch game, feel the smoothness
