When you try to install Joomla 2.5 through Microsoft WPI you get the following error:

"A previous version of Connector/Net 6.3 or higher is already installed. Please uninstall that version first."

In order to bypass this error you must delete the following entries from your registry.

HKLMSoftwareWow6432NodeMicrosoftWindowsCurrentVersionUninstall{2DDC7E93-29AB-4260-A9DB-697F7FA88157}

HKLMSoftwareWow6432NodeMicrosoftWindowsCurrentVersionUninstall{5FD88490-011C-4DF1-B886-F298D955171B}

Note: Always backup your registry or make an export of the keys your are going to delete.
