Close all Chrome windows

- Edit "**Local State**" file in the **C:\Users%username%\AppData\Local\Google\Chrome\User Data** (assuming C: in your System Disk)
- Search for "**enabled_labs_experiments**":[]
- Between the brackets insert "**omnibox-ui-hide-steady-state-url-scheme@2**" and "**omnibox-ui-hide-steady-state-url-trivial-subdomains@2**"

Now your entry should look like

"enabled_labs_experiments":["omnibox-ui-hide-steady-state-url-scheme@2","omnibox-ui-hide-steady-state-url-trivial-subdomains@2"]

Save and open Google Chrome

Enjoy
